

Discharge Summary Draft

Patient-friendly hospital discharge packet · Source-grounded AI draft

DRAFT ONLY

PATIENT Missing from source documents. Clinician review required. This field is marked missing if not clearly present in the source documents.	PRIMARY DIAGNOSIS ACUTE GASTROENTERITIS WITH DEHYDRATION
---	--

ADMISSION Missing from source documents. Clinician review required.	DISCHARGE Missing from source documents. Clinician review required.	CONDITION Hemodynamically stable	SAFETY GATE Passed
---	---	--	--

Draft for clinician review only. Not a finalized clinical document. This report is designed to be easy to read, but it still requires clinician review before use.

DIAGNOSES
- Principal: ACUTE GASTROENTERITIS WITH DEHYDRATION - Secondary: URINARY TRACT INFECTION

HOSPITAL COURSE
Patient presented to us with above mentioned complaints. After evaluation, she was admitted to ward., Initial investigations showed normal CBC. Serum creatinine (1.65mg/dl) done was elevated. Serum electrolytes done showed low serum sodium(128 .00mmol/L). Urine routine done showed ketone bodies(+). 10- 12/hpf of pus cells, 15-200hpf of epithelial cells with presence of bacteria hence urine culture and sensitivity sent- report awaited, She was treated with I'V fluids, I'V antibiotics, 1V PPI's, IV antiemetics and other supportive measures. USG abdomen and pelvis done showed Grade-1 fatty liver changes and mildly edematous part of ascending colon upto the hepatic flexure- could represent colitis. Repeat Serum Creatinine(1.17mg/dl) done was normal. TSH and Free T4 done were normal. Stool routine done showed 2-3/hpf of red blood cells, plenty/hpf of pus cells. Patient was advised to stay back for further management but attenders not willing to the same, hence being discharged at request with following advice

RELEVANT INVESTIGATIONS

Investigation	Result / Finding	Status
Serum Creatinine	1.65 mg/dL	Available
Serum Creatinine	1.17 mg/dL	Available
Repeat Serum Creatinine	1.17 mg/dL	Available
Urine Pus Cells	10- 12/hpf of pus cells	Available
Urine Epithelial Cells	15-200hpf of epithelial cells	Available
Urine Ketone Bodies	ketone bodies(+)	Available
Stool Red Blood Cells	2-3/hpf of red blood cells	Available
Stool Pus Cells	plenty/hpf of pus cells	Available
Rbs	496.00	Available
Abg Sodium	114 mmol/L	Available
Abg Potassium	265 mmol/L	Available
Haemoglobin	11.80 g/dL	Available
Platelet Count	1.80 Lakhs/cumm	Available
Pending Culture Or Report	Urine culture and sensitivity sent- report awaited - PENDING	Pending

DISCHARGE MEDICATIONS

Medication details are separated into fields. Unclear OCR/source items are intentionally highlighted for clinician reconciliation.

Medicine	Dose	Frequency	Duration	Status	Review Note
raciper mg	Not clearly documented	1-0-0	Not clearly documented	UNCLEAR	Medication line contains OCR noise or mixed fragments.
emeset i	Not clearly documented	Not clearly documented	Not clearly documented	UNCLEAR	Dose, frequency, and duration were not clearly parsed.
strong	Not clearly documented	1-0-0	15 DAYS	STRUCTURED	Parsed from source text
tan zevott	Not clearly documented	1-0-3	3 DAYS	UNCLEAR	Medication line contains OCR noise or mixed fragments.
meftal spas	Not clearly documented	sos	Not clearly documented	STRUCTURED	Parsed from source text

FOLLOW-UP INSTRUCTIONS	PENDING RESULTS
Urine culture and sensitivity sent- report awaited. Review immediately in case of fever, loose stools, vomiting, fatigue; 09.03.2026	Urine culture and sensitivity sent- report awaited. Pending at discharge.
PROCEDURES	ALLERGIES
Missing from source documents. Clinician review required.	Missing from source documents. Clinician review required.

CLINICIAN REVIEW FLAGS (12)
• pending_results: pending. Clinician review required. • patient_demographics: missing. Clinician review required. • admission_date: missing. Clinician review required. • discharge_date: missing. Clinician review required. • procedures: missing. Clinician review required. • allergies: missing. Clinician review required. • Medication reconciliation: admission_medication_list is unclear; no documented reason found. • Medication reconciliation: raciper mg is added; no documented reason found. • Medication reconciliation: emeset i is added; no documented reason found. • Medication reconciliation: strong is added; no documented reason found. • Medication reconciliation: tan zevott is added; no documented reason found. • Medication reconciliation: meftal spas is added; no documented reason found.
